1956

Our 33rd Annual Catalog

GELSER BROTHERS

DALTON, N. Y.

Greetings

We take great pleasure in presenting our catalog for 1956. Our listing contains the best of the new and older varieties as well as the best of the foreign varieties.

We had a very good growing season despite an unusually dry year. We do not have as many large or No. 1 bulbs as usual because of the dry weather, but they are exceptionally free of disease and, as for thrips, we had none.

All our bulbs have careful handling in the field and in storage to prevent bruising. All bulbs are inspected when cleaned, also a second inspection at planting time, which we believe is the best way to eliminate disease.

We personally inspect every order before it is packed for shipment. Our policy is not to grow more *Gladiolus* than we can give our personal attention.

We wish to thank you for the many fine orders we received last season.

With best wishes for a good Glad year.

Sincerely yours,
Gelser Bros.

Extras

We always give extras in count in new varieties if our stock permits. We have reduced our prices on most items, which we believe is much better than allowing discounts.

Prices and Terms

Gladiolus prices are good for this spring only and good only as long as our present stocks last.

Terms: Full remittance should accompany ALL orders. However, we will ship C.O.D. on request, when 25 per cent of the amount of the order is paid in advance.

Size of *Gladiolus* Bulbs

Large bulbs are 1¼ to 2 inches or more in diameter (No. 1 & No. 2) the best blooming size.

Medium bulbs are ¾ to 1¼ inches in diameter (No. 3 & No. 4). This size will give good bloom, but a little later than the large size.

Small bulbs are ⅜ to ¾ inches in diameter.

When there is a figure before the price of a variety, as 2-15c or 3-15c, it means 2 bulbs for 15c, or 3 bulbs for 15c, etc.

Cultural directions will be sent with all orders.

Delivery Charges

We pay the delivery charges on bulbs selected from our retail list. Bulbs priced by the 100 are also prepaid.

Order Early

Please place your order early in order to avoid disappointment, as a great many varieties will be sold out early. It is important that orders for small sizes and bulbets be received early, as we begin planting our own stock in April and may not have the stock to fill late orders.

The cost of producing stock has increased, but we have not increased our prices. In many cases we have reduced them in order to sell out early, as we must curtail our planting this year, so it will be wise to take advantage of our prices now.

Second Choice, Please

Due to the heavy demand for bulbs this year, it is to your advantage and also to ours, if you would give a second choice, either in size or another variety.

Please Read Carefully

We ship either by parcel post or express, whichever we think is safest and best at time of shipment.

On fair sized orders we advise shipment by express in cold weather as express orders are insured against freezing.

We prepay the delivery charges on all bulbs listed in this catalog.
25 bulbs sold at the 100 rate.
